Ideation Phase: Define the Problem Statements

AI Weather Wise API Project Documentation

Date	25 September 2026	**Project Name**	AI Weather Wise API
Team ID	SWTID-2026-4307	**Maximum Marks**	2 Marks

Customer Problem Statement Framework

EE template customer-inte point of view understand cheyyan vendi thayyarakkiyathaanu. AI Weather Wise API project-il customer-inte aavashyangalum, avar neridunna prashnangalum, athine thudarnnu avarude bhavangalum ethra vyakthamayi prathipadhikkunnu ennu e document-il kaanam.

Statement	I am...	I'm trying to...	But...	Because...	Which makes me feel...
PS-1	**An Event Organizer or Outdoor Travel Planner**	Plan outdoor events and schedules with accurate, real-time, and predictive weather insights.	Traditional weather APIs provide static, generic raw data without smart recommendations or actionable insights.	Existing weather tools lack AI-driven decision making and context-aware natural language summary.	**Frustrated & Uncertain**
PS-2	**A Mobile/Web App Developer**	Integrate intelligent, personalized weather alerts and automated advice directly into my application.	Integrating complex AI models with weather data pipelines requires heavy infrastructure and high API costs.	There are very few lightweight, ready-to-use AI Weather APIs that deliver direct actionable advice rather than raw numbers.	**Overwhelmed & Delayed**
